"You willingly immerse yourself in the gentle truths of Sue Brescia's haunting style. You'll never forget the way her music made you feel" 9 MP3 Songs EASY LISTENING: Vocal Pop, POP: Ambient Pop Details: I've recently enjoyed the release of Hope Rising, a humanely emotional mix of songs about life, love, and loss. Hope Rising debuts off of my own label, Gentle Spirit Records. The 9 songs that grace this CD were all written, performed and produced by me. Each one speaks to you, gently tapping you on the shoulder, reminding you that hope does exist right around the corner. "Stepping Stones" implores you to walk through your fear. "Forget You Never" consoles those faced with Alzheimer's Disease, reassuring the listener that the heart never forgets. "On the Way to Finding Peace" is a call for peace and acceptance for all mankind. Like many artists, my career arose at an early age. It began on an upbeat note and, actually, on a much more different path than where I am today. I started out as a singer in a top 40 band, while managing to find time to perform in various cabarets and theaters throughout the New England area. Several seasons in summer stock theater followed by a cabaret performance for His and Her Majesty, Prince and Princess Michael of Kent, and a few appearances at New York's Catch a Rising Star. Shortly there after, I earned my actor's equity card and began auditioning for Broadway. During that time, the tempo changed and I had to put my musical career on hold while battling a rare form of cancer. Throughout those years, I re-directed my passion as a performing artist and began writing songs; songs immersed in meaning. It was then that I produced my first release, Tree of Life, and found my hearts true desire during one of the darkest times in my life. Today, you'll find me, once again, on an upbeat note, emerged in promoting this well received CD, Hope Rising. Rest assured, as long as I'm breathing, I'll be writing, singing, recording, promoting my muse in hopes of stirring many a soul. "Sue has a genuine and sweet soul. Her music touched me. The masses should hear her soul. David Brown - Creative Life
