

Mp3 William Verkler - About Normal

[DOWNLOAD HERE](#)

Music that makes you tingle, and want to hear it again and again. Easy Listening, Dynamic fun. 15 MP3 Songs EASY LISTENING: Mood Music, ELECTRONIC: Virtual Orchestra Details: The louder you play this music the more instruments you hear. I used instruments,an extensive drum kit,as well as the Roland fantom X8 KeyBoard loaded with the best enhancement modules. The piece "About Normal" may be used in a TV/Movie project in the near future. I mixed that piece 11 ways for the writer/producers to fit many moods. The two mixes on this CD are track 5 the original and track 15 a lighter mix with the percussion and harmonica toned down a bit. "Gotcha" has a near James Bond sounding ditty that pops up a few times. Track 14 "What Have We Become" you have to just hear for yourself. Its non party politically funny. Mostly its about the turkey's we have become under any leadership thats thrown our way. The CD plays even better on sound around systems,and is very nice to hear on the vehicle CD systems as well. Its a great speaker tester. I hope you Enjoy this one as much as I do. Its more upbeat than some of my previous music. The sound quality is superb. Check out my other CD's on CdBaby. You are bound to find something that opens up your imagination and makes your brain cells skip a beat...
