DEATH LOVES brand of synth rock sounds like if you were to record music playing through a blown out speaker underwater and then played the recording through a fan. It sounds something like that except with an emphasis on melody and bass. 16 MP3 Songs ROCK: Hard Rock, METAL: Alternative Metal

Details: DEATH LOVES is the solo project of Marques Cannon. I was sick of hearing the same type of unoriginal music on the radio and television so I decided I should try to create something original. After being exposed to synth rock bands such as Orgy and Deadsy, I knew what kind of music I wanted to make. This genre was original and fresh. It combined all of the elements I loved such as heavy driving guitars and electro beats and effects. And yet, there was very little of this style of music out there. So I decided to change that. DEATH LOVES is the final outcome of that and it is everything I wanted it to be. Loud, fast, and not like anything you've ever heard.
