Possibly a break dancers small dream. It has the bass drums, thump, snare hits, robot voices and odd sounds to open the senses. Just imagine a transformer robot in his state of recharging. He'd be listening to this cd on his pioneer kickers. 17 MP3 Songs EASY LISTENING: Mood Music, ELECTRONIC: Experimental Details: "Sounds that confess to the ear, Bass waves that bleed towards the heart, Melodies that disturb the mind in a new direction, and echoes that stimulate the nerve known as Qnerve." renesuchil.com "Hello, My name is Rene Suchil As you can see I use music like a pencil I use it like a wise utensil To make you smile. More than a style With the plucked sounds of the 3xOscillator It becomes all worthwhile Making your problems fade into a blur Not knowing what just occurred. With the bass waves of the TS 404 That follow the reverse snare drum beats Effortlessly opening your heart like a door With the help of the stuttering sounds of the granulizer. Taking you hostage like a space visitor While the choir strings lay you at seashore Opening your eyes you could have swore That you took flight and soared." This is the music you wished the radio would play in your town. This is the Music you hoped someone would finally make. Your friends will ask you, "Where'd you get those beats, and how'd you make that bass?" Music With Thump.
