This music compilation begins with Solo Piano ends with Solo Guitar; with a bit of jazz, meditation and pop inbetween. 16 MP3 Songs JAZZ: Jazz Fusion Details: Brian Keys was a solo piano music genius at the age of 6 when he attached the concept of 'piano' to his soul. As the years have flown by, his musical talents have awed many people. Classically trained at the UofU by great teachers including Solveig Madsen; his solo piano music reflects the cerebral as well as his always present, natural lucidity. Although this CD has no lyrics his Lyrics have seen radio air-play on THE BREEZE 'Smooth Jazz Radio' Via: Lee Ritenour on 'DREAM AWAY'. Brian performs live at OneMind in SLC. Look for more exciting music, a dvd lots more from this very talented being.... "Someone should call the supermarkets and shout, "this is the smooth jazz you should be playing!" Alternating between tender, deeply felt passages and virtuosic runs, this Utah pianist is setting about saving that genre from its sappy reputation. And with a style that's as comfortable playing Bill Evans cool as '70s-synth acid, how could he fail?" - Editors @ music.download.com
