singer-songwriter eclectic acoustic folk-pop 8 MP3 Songs FOLK: Modern Folk, FOLK: Folk Pop Details: this first cd i recorded was done home grown in Webb Canyon, Claremont, CA. i enlisted friends to help me record and play on this album. i did not know what to expect with the outcome but for my first try i thought it was pretty good. i think of it as an alternative pop-folk album. we recorded late into the night recording drums in the living room and guitars and vocals in bedrooms then i would get a few hours of sleep and go to work. alan waddington who played drums and john mcknight who played bass and keyboards were instrumental in making this recording happen not to mention the tireless efforts of alan van gundy who engineered it. enjoy.
