Ten (10) more gems by one of the best singer/songwriters you've never heard of. 10 MP3 Songs FOLK: like Joni, COUNTRY: Country Folk Details: This is the follow-up to my F\*U\*B\*A\*R cd. Not as political or socially conscious as F\*U\*B\*A\*R but a collection of sometimes funny, a bit off color, quirky songs that are held together by a mostly acoustic, very immediate sound. Recorded mostly produced by Jeff Coleman in Lancaster, Pennsylvania. It is befitting of this description I once read in a National Lampoon Magazine article "it's from an unstrained Tijuana lid with a slow rush - but I think you'll be zonked by the flashback". Try it before you buy it!
