Psychedelic electronic rock. 8 MP3 Songs ELECTRONIC: Electronica, ROCK: Psychedelic Show all album songs: Diving Belle Songs Details: Discovery of Magnetic North is the duo of Brian Phillips and Richard Jerousek. Based in a parallel pole of a pseudo earth, they explore the melancholic geography of a sonic planet sporadically adorned with dysfunctional mid-tempo, subtle beats. While these ghostly rhythms are captured and documented by electromagnetic devices affected by the sun and restored by digital technologies, a flow of ambient human vocals is offered to make this a fair trade. As the North Magnetic Pole, this duo is continually moving in an irregular path around its average position because of fluctuations in the magnetic field. Enabling listeners/navigators to accurately plot their childhood memories, this duo reinforces the importance of connecting with a source almost forgotten. -- Bio by S.E.B.
