The debut neo-industrial release by futureBLU. If you like what's on the radio these days, you will HATE this... 10 MP3 Songs ELECTRONIC: Industrial, METAL: Industrial Metal Details: A diverse and powerful necessity for everyone who hates the s#t on the radio! Prior to the release of the album, four web servers crashed when too many people were trying to download the pre-release of "breatheME." This neo-industrial solo project has been compared to the by-product of a relationship with NIN, Marilyn, KoRn, and Incubus, but with a stronger melody driven backbone. "What makes this project unique," stated BFTIYM from a major Chicago publication, "is that the music itself is very uplifting. It's the harsh, yet tonally focused vocals amidst the aggressive progressions that makes futureBLU what it is. The diversity within the album is what keeps the mind of the listeners wanting more. [Jim] has been recognized several times as being one of the most textually powerful writers in the genre. One will not understand the sincerity of my statements until they have heard it for themselves." Decent quality, but the first album from many more to be...
