Elf Bluegrass, music of the wood elves 11 MP3 Songs NEW AGE: New Age, FOLK: Gentle Details: Inspired by the writings of JRR Tolkien, utilizing acoustic instruments and percussion, this music is not about this world, and makes no reference to this world, but to another; a world of enchantment. Sweet lilting strains of melody dancing through the treetops. Songs of happy days and pleasant lands, Ancient tales of glorious worlds in past ages long since passed away but not forgotten. Songs of the forest, Songs of bittersweet remembrance of ages past, Songs of Romance and the magic of Love, Songs of celebration, and of course dances and reels of which the elves are very fond. When I hear these melodies coming through the trees, My heart warms within me. As if the curtains of my mind were drawn open, The world is somehow different...
