

Mp3 Lumpy - Tarantula

[DOWNLOAD HERE](#)

Led Zeppelin, Beatles, Leo Kottke and originals, it's pure acoustic instrumental fingerstyle guitar recorded without reverb, overdubs, EQ or effects, just as if you were live in the front row. 14 MP3 Songs EASY LISTENING: Mood Music, ROCK: Acoustic Details: This album, Tarantula, was recorded perfectly flat. No tone equalization, no reverb, no compression or chorus. No overdubs. No corrections. Fourteen songs, recorded in one sitting, one take. Just as if you were in the front row of my live show! The only editing at all done to this recording is that the space between songs, where I retuned the guitar, was trimmed out so that the listener doesn't hear the retuning. And of course, you don't hear the absolutely hilarious jokes, stories and other live audience patter that goes on in my live show...:-) It's as naked as an acoustic guitar can get. The Guitar is a Lowden F-23 Cedar/Walnut, setup and customized by Luthier Michael Bashkin in Fort Collins, Colorado. The guitar strings are CF Martin SP-4250 13-56 Phosphor Bronze. The pickup is a stereo soundboard transducer from pick-uptheworld.com.
