

Mp3 Precious Red - Closer

[DOWNLOAD HERE](#)

Blue-Collar Christian Rock. An awesome listen from beginning to end. 8 MP3 Songs GOSPEL: Contemporary Gospel, ROCK: Progressive Rock Details: CLOSER... From the penetrating vocals of Steve Thaemert to the incredible drumming of Zach Miller, "Closer" is an addictive playlist that puts both the ROCK and the WORSHIP in a rock-worship album. The creation of producer-engineer Matt Patrick, this album is a solid example of great production.. Catchy chorus', edgy guitars, and a nice "full" sound really make this album a great listen from beginning to end. From the opening track Surrender to the beautiful finale Carry Me, you'll experience strong songwriting with honest lyrics and an openness and transparency that will lead you into worship time and time again. "Precious Red and Matt Patrick have combined to create a great rock record. Killer guitars and honest vocals collide to create some very compelling songs. This is a great first record for Precious Red and a wonderful lesson in production from Matt Patrick. I'm going to go fire up my Marshall!" - Joel Hanson Precious Red is a great example of a blue collar, straight-and-simple rock band. From driving worship to songs that are hard and heavy, Precious Red has it all. "We have a lot of variety in our music while still maintaining a unique sound. It's rock, all the way... it moves, it mellows out. It's a cool mix. 'Closer' is a great CD... it takes you on an emotional ride and leaves you wanting more. I'm very proud of it." - Steve Thaemert, Precious Red frontman Produced and engineered by Matt Patrick, "Closer" is a wonderfully produced album. Matt, former bassist of Pegtop, does a fantastic job pulling everything together and packaging it up... capturing the energy of a Precious Red concert and putting it on a disc. "I am so blessed to have had the opportunity to produce a CD with Precious Red. These guys are great to work with and their songs have moved me deeply." - Matt Patrick Visit Precious Red at preciousred.net
