We got this great idea in working together from our early days of our 4 track multi- recording machines to where we are now our 8track digital workstations and some of the most incredible digital sequencer softwares in the market like Cakewalk Sonar 2 and Cubase. And although we live in different states we thought about incorporating our music thur the use of mail and the internet to form up this special group of multi-talented musicians and songwriters. Jack Rogers came aboard on early 2001 and lastestly with Will Fletcher. Every member writes his own material we all work collectively and incorporate whatever parts need to be added. Everything that we do is a well thoughtful plan. We got voted "Best New Artist and Best New Song" on two websites, voted "Artist of The Week" in Holland. Won a Golden Web Award for our work on our website. And came in the top 5 in "The Battle of The Bands" at Xoom.Com now owned by NBCi. And also came in the top 20, "Century Fox" Songwriting Contest for the film "Dude, Where Is My Car". And have had our music plyed in the several areas in the US, Canada, UK, Scotland, Ireland, Germany, Portugal and Russia.
