Easy Banner Maker Pro - Banner Templates+2 Mystery Bonuses!

DOWNLOAD HERE

Comes with two UNANNOUNCED BONUSES! Save $100's On Banner Design Fees and Create Amazing Banners Yourself Any Time You Want, In Minutes! What makes this special is the ease of use, and the quality of the final banners ANYONE can create, with no design experience. The way it works is - you pretty much get all of the "elements" that make up a professional banner design - all pre-formatted for you and ready-to-go. So, it's basically a highly customizable template based system, where you get "master templates" and "copy and paste elements". And when you combine these 2, you get virtually an unlimited number of different banners you can create, in all of the most popular sizes! You CAN add your own images, logos, text, and whatever else you want to these banners. You're not limited to the stuff that comes with this product. This product is highly customizable, and you can make the banners look just like

you want. This banner maker is also so powerful that you can also just use all of the pre-built "effects", "elements", and text that come with it - without getting extra images. And that will be good enough. It's all up to you. Here are is exactly what you get in this package: 1. First, you get the "master" templates in all of the most popular banner sizes. You get 8 of these "master" templates, in 8 sizes (in pixels): 120x600, 250x250, 200x200, 468x60, 120x240, 180x150, 125x125, and 234x60. These master templates come pre-installed with background "effects", and background "shapes". These effects and shapes basically add some flair to the banners, and make them more exciting than just plain solid color banners. 2. "Copy and Paste Elements". These are basically pre-formatted "elements" for the inside of your banner design. They're things like text, bullets, and buttons. And all of these come pre-formatted with cool effects and styles applied to them. And you can simply copy and paste these into your own designs and the master templates. You can customize all of these "elements" in pretty much any way you want. Change the text to your own exact text, change the fonts and sizes of the text, change the colors, resize, rotate, distort and pretty much do anything else to all of these. You can even use most of these things for high res print graphics (300 DPI). Here are these "elements" that you will get: -Pre-Formatted Text -Pre-Formatted Bullets Text -Pre-Formatted Call to Action Buttons And more! 3. To make it easier for you to customize the "copy and paste elements" and the master templates, I'm also including over 180 layer styles that you can apply to your graphics with just a few clicks. Just choose the "element" or any other graphic you have, click on the layer style, and it instantly get's applied to it. There are 2 variations of these styles: 1 set with drop shadows, and one without. Plus I'm also including a separate PSD file with all of these layer styles on their own layer, so even people with Photoshop Elements can easily apply these layer styles to their graphics. 4. You also get step-by-step video instructions on how to use everything, so you'll be up and running right away. In one of the videos I re-create one of the sample banners that you see on this site in real time. You get over 30 minutes of these video instructions. Quick FAQ: Q. Do I need any special software? A. Yes, you need either Adobe Photoshop or Adobe Photoshop Elements. Q. Is this easy to use? A. Yes, very easy. All you have to do pretty much is chose the "element" that you want, customize it in your way, copy and paste into where ever you like, turn on or off a few effects, and move things around. It's like a "pain-by-numbers" system, with no design skills required. And it all comes with step-by-step instructions. Q. Can I add my own images and graphics to the templates? A. Yes, these templates are highly customizable. You can add any images you want, any graphics you want, any text

you, and pretty much anything else you want. Q. Are there different sizes of banners to choose from? A. Yes, there are 8 sizes to start from (in pixels): 120x600, 250x250, 200x200, 468x60, 120x240, 180x150, 125x125, and 234x60. Plus you can also resize the headers further to create the exact size that you want. BONUSES: BONUS#1: 21 Header Graphics Templates - FULLY Customizable! (PLR): This package contains 21 header templates in .PSD format and .JPEG format (blank), plus 21 sample templates in .JPEG format. These 21 headers are FULLY Customizable! BONUS#2: To make the deal even sweeter for you, we are even including two unannounced bonuses with it! Only those who purchase this product from us would be able to get the bonuses at NO cost! So what are you waiting for? Order today. 30-day money back guarantee! In case you are not 100 percent satisfied with your purchase, simply contact us within 30 days of your purchase and we will refund every penny! No questions asked!
