WORLD: Reggae, POP: British Pop Details: O Wotta Bam Bam! - Queen of Pop Reggae - Raised in England, Bam Bam (Princess Bam Bam) grew up with the knowledge that she was descended from 'royalty' ('Mad King John'- the infamous creator of the Magna Carter - according to her grandmother!) --- But he was a villain and Bam Bam felt she had to change the family image by championing the cause of the underdog....As she embarked on her own unique adventure into music she did so believing that she was, in some way, going to affect the world in a momentous and positive way....She studied oil painting at Goldsmith's College in London where she thrived on England's historical vibes and ancient mythology. She soon discovered her true musical roots in the smoky caverns of London's underground Ska and Reggae culture clubs. Recognizing the significance of Reggae music, she started to write songs and hang out with Jamaican musicians. One of whom was Jon Cornelius of Raskidus Roots Connection. They worked together promoting Reggae shows and recording original material. Soon she had recorded enough material to release her first CD entitled: "Power of a Woman"She coined the expression "Pop Reggae", descriptive of her upbeat, 'rootsy' English style. Her songs carry strong, positive messages buoyed along by da rockin' Reggae riddims...Give thanks and praises to the Almighty JAH!...Rastafari
