New Age Advante Guarde Pop 7 MP3 Songs POP: Quirky, EASY LISTENING: Mood Music Details: Previously from the Syrens Of Titan, Catherine L. Wilson releases her first debut CD, entitled, "Awakening f. h. cazzette". This CD is extremely ethereal and is edging new age into gothic and pop-ic proportions. Being told she is original, unique and "different" hasn't barred C. L. Wilson from her task, "Music is a gift, it is to be channelled and manipulated to express your views of this world and beyond... personally, "I listen to music to leave this world, I don't listen to music that reminds me of it!" Although classically trained as a child, Wilson found less time to play "dead people's music", and focused on creating worlds where she could escape too. Wilson's creations take you to another world with sweeping soundscapes which are often commented as sounding much like movie soundtracks more than quirky pop tunes. "Music and Images co-exist, in which they cannot be separated... each electronic pulse and melody have a picture attached to it within the mind, and the picture is unique to each listener and their experiences.", comments Wilson. Today she runs her own production company, Eildon Tree Productions, while holding degrees in Reiki 1st degree and Music Business Administration.
