With Magic Button you can wield that power in just three mouse clicks. Okay right now you may be wondering what the heck's a Magic Button and what does Magic Button software actually do. Magic Button allows you to generate highly customisable, attention grabbing and unblockable links. Text or images or both - you choose. . . . You can see an example on this page promoting my newsletter. It hasn't been blocked like a PopUp and it's not 'In Yer Face' annoying like on of those floating ads. (Don't you just close them down anyway?) ++ reseller ad your own created code to this page to send people to your newsletter - the original example code has been removed. The Magic Button simply follows you down the page, but you can make them move, you can change the position on the screen and you can use different images in a whole range of different sizes. The more eye catching, hypnotic, tempting your offer (however you want to call it) the more it'll be clicked. You can use it for absolutely any link you like - what if I was to make this an order link - The moment a prospect had got to the point in my sales copy and is ready to order - the order now button is at hand. Here are just a few of the many successful uses for Magic Button: If you promote an affiliate program you need people to click your links and visit the

affiliate site so that you earn commissions. If you run a newsletter or eZine you need people to sign up for it and preferably with their primary email address. If you offer free ebooks or eCourses you need visitors to download them. If you sell your own products your aim is to get people to click through to your 'order' page the moment they're sold on your product. It goes without saying - to do any of these things requires some level of experience. You need a good presentation, your web site must look professional, you need enticing sales copy and you must command action. . . . But what if you could achieve similar results in just three or four mouse clicks? Once you own Magic Button, you'll have the ability to get visitors clicking the links you want them to - when you want them to. Because you'll have the power to convert your traffic far better you'll be spending less time doing the tasks you hate and more time concentrating on your business and your products. Just picture yourself not having to spend hours each week buried in search engine promotion, traffic exchanges, and banner advertising.
