A string quartet with a piano, playing "modern" music with the Argentinian rhythm behind. 7 MP3 Songs  
WORLD: South American, LATIN: Tango Show all album songs: Contra Las Cuerdas Songs Details: In this album I used the Folk rhythms of my country (Argentina) as the zamba or the chacarera. The structures are simple, the themes were composed as songs and then I wrote the arrangements for piano and string quartet. The harmonies are something that doesn't care for me; my guide is always the melody or the groove, more than ever here that I have the strings. There's a theme that it's always on the same tone (El Bosco), and there's another one that imitates the harmony of a Jobim song, as a tribute to the master.
