Piano and guitar melodies to calm the mind, relax the body, and relieve the soul. 6 MP3 Songs NEW AGE: New Age, NEW AGE: Meditation Details: Welcome to the Lou-age Music Adventure. Lyricless is relaxation music similar to the new age music genre; soothing melodies to relax the mind and release the tension of life. Simple piano and guitar melodies mix to provide an outlet for chaos and anxiety. The music creates a gap through which the mind can wander like the wind, and get lost in the warmth of organ and string tones lying below the melodies; losing tension, and yourself, along the way. Losing your mind never felt better. One moment in time relived from a memory, a feeling, or an event that brings content to the soul. Experience again precious memories and feelings of the past, escape in the now, or relieve anxieties of the future. Take the Lou-age Music Adventure to soothe the soul and regain strength from serenity. As a new endeavor, Lyricless speaks of how life changes people, and the many layers and complexities an individual discovers about themselves throughout life's journey. With so much going on in our lives, we need to find a way to find peace within ourselves, and within our relationships. Find the stillness that eludes you. Lyricless can be background music for massages, meditation, used as mood music for lovers, or simply as a music storyteller before bed time. Some things can't be said in words. Music can tell a story, revive a feeling, or relive a moment in time. Everyone has a story. Lyricless is the music through which you can tell your own story.
