Thought inspiring uptempo blend of electronica, techno, jungle, and ambient. 9 MP3 Songs

ELECTRONIC: Techno, ELECTRONIC: Ambient Details: Spherical Motion is an uptempo fusion of electronica, techno, jungle, and ambient into a smooth yet dynamic soundscape. From hard drums and basslines to dark ambient textures to abstract thought-inspiring melodies, this album has a tracklist that will entertain everyone. This album brings together four unique artists in a collaboration of music and animation. Our debut album Spherical Motion is the first in a series of musical efforts that will be the basis for the Radius DVD, featuring computer generated 3D animation action sequences and effects in full Dolby Digital surround sound. A love for deep resonant basslines and complex rhythms led Scott Robinson (founder of Radius Productions, Electronic Musician, and Producer) to embark on this album. An extensive background in percussion, keyboards, digital recording, and synth programming has prepared Jack Mazzotti (Electronic Musician, Mixing Engineer, and Pre-Mastering Engineer) to generate intricate melodies and remix Spherical Motion. Her deep knowledge of mood and emotion in music has primed Natasa Lisica (Electronic Musician and Co-producer) to create rich and elaborate ambient soundscapes to enhance this album. The goal of Radius Productions is to produce 2-3 albums in the time that it takes to produce our animated DVD. The animation would not be possible if it were not for LD Walker (animator, 3D designer, and graphic artist) who also served to create many of the albums' unique 3D images. Proceeds from your purchase will go towards the making of the DVD.
