How many times have you thought about how you were going to get your website up and running if you dont know how to do it or even where to start? Sometimes, things just seem completely overwhelming. But, in order to have an online business, you really must have a website. So, whats the solution? One solution would be to hire someone to build you a website, but at a cost of \$1,000 to \$5,000 for a website, who can afford that when you are just starting out? There is an easy way to do it yourself. And, it really is not that hard! There is an open source software called Kompozer that you can download for free and use to build your own websites. The video tutorials presented here, called Kompozer4Newbies, take away the pain of learning webpage editing and make it very easy to get your website up and running in a short period of time. You will learn everything you need to know to build your site, and its all presented in step-by-step easy to follow instructional videos. Plus youll also be shown the short-cut route of using templates to get you going much quicker. And when you know how to build a real website you can apply that knowledge to put together much more professional looking eBay listings and attractive blog posts. Heres Whats Inside The KompoZer4Newbies Video Series: Video #1. You will learn where to find this

free software and how to install it on your computer. Video #2. This video teaches you how to get your website ready to display your content in an organized and easy to use format. Video #3. In video 3, you learn how to add images and text to your pages and how to format and position them. Video #4. Here you will learn about creating multiple pages and how to link them together using hyperlinks. Video #5. Video is a must on webpages these days. This tutorial shows you how to add video in a quick and easy way. Video #6. Here the first of three videos introducing you to CSS. You will learn how to format regular text, and you will learn about the H1 tag that the search engines pay so much attention to. Video #7.
