Bambaji plays regularly among nationally and internationally toured acts, and performances range from weekend gigs at premier clubs in downtown Seattle, to major events and festivals throughout the Pacific Northwest. REVIEWS: "PunkFr" (French fanzine) (Translated from French) First official exit for this young group of the banlieu of Seattle (the USA), "Just one chance" is already a beautiful part. Produced relatively well (very far from the sound "at the bottom of the garage" from much of young formations ska) and arranged, the group shows already large qualities in this field. The beautiful voice of the singer adds an unquestionable sensitivity to this formation. The songs are rather copied on melodies a little "variety" but without never overflowing on the pop one (presence of brass in each song, guitar ska). The rate/rhythm is hopping and is rather enjoy (see "Tied Down"). Certain song left the batch but the album is rather constant. In short an album of good ska for a group which can still make a max of progrs (brass solos should be exploited because they are very well played) and which will be of not to doubt a formation to follow in next times. Worth Title: "Tied Down", "Maybe I should" (a little rnb jamacain very succeeded), "All I ever wanted"....
