uplifting, toe tapping guitar/horn section flavored pop/rock tunes with bluesy white-soul vocal. gets funky. big chorus hooks with sweet harmonies and fat real drummer backbeats. 10 MP3 Songs ROCK: Roots Rock, ROCK: Funk Rock Details: If you like fat backbeats with pop/soul hooks this is your CD. Guitar, Hammond B3, horn sections, big hook choruses and a couple loose soul jams. Uplifting tunes played by "real" people with no fancy studio trickery. I got my style from Motown acts like Marvin Gaye, Stevie wonder and Temptations. Also love that rock stuff like REO, Bad Company Beatles and then if you mix in a little Huey Lewis and Eagles...there you have it. So slide Detroit lean into your CD player, turn up that volume knob, kick up those wearied feet, pop open some liquid libations of choice or roll down your windows, put your elbow out, tap you foot and let the blue eyed soul waves float down the boulevard as the wind and guitar riffs hit your smiling face. Many enjoyable singing, songwriting, knob twistin' guitar jammin' hours went into this project over a 8 month period. Great playing, hard work and inspiration among friends family brought Detroit lean to life. I'm so proud of everyone...and proud of this album. For those of you new to my music, Detroit lean is my musical journey and homage back to some of my favorite ingredients in all the great Motown records, the Eagles, Bob Seger, Wilson Pickett, Stevie Winwood, Edgar Winter, Tower of Power, Jack Mack the Heart attack, Bad Company and so many others. It is a new album and it has my spin on things for sure. C'mon hop in, get behind the wheel, take a spin for yourself and I think you'll find yourself Leaning !
