ROCKROLLROLLROCKROCK-ROLL. 11 MP3 Songs ROCK: Punk, ROCK: Modern Rock Details: To  
give a better idea of our sound,the following is a recent write up about our music: What came thru the PA  
was a breath of fresh air and a sigh of relief. We had become accustomed to bad demos and mediocre  
"genre bands". It felt like ages since we had found anybody actually writing songs. The possibilities of  
show and the excitement of embracing a new band and sharing them with others was too much. I  
instantly loved the name Padallock Grafts. Yes, I would say I liked it right from the start. A solid strong  
rhythm section pushing thick beats and structure along side chunky guitars and underneath it all was life;  
an actual rhythmic pulse. The biggest surprise that poked thru the one-track demo was the amount of  
confidence that resided in the arrangements and over all composition of the song. Nothing beats structure  
within chaos and imagined songwriting. Their music sung like an experience and not a regurgitation of  
indie-rock influences. The melodies were not forced with heavy handedness it felt natural, and the song  
kept you at it's side on a hip stroll thru pop brilliance. -Excerpt from backbooth.com, Bands We Like
