Wallpaper is the first solo release from the Sombrance singer/songwriter, Rick Mester. It is a hooky pop record with mood swings. 8 MP3 Songs POP: Folky Pop, ROCK: 70's Rock Details: What's to tell? If you actually spend the time to read this then you should be given a cookie! And not the kind that this website may have dropped in your Temporary Internet Files Folder! I spend a lot of time writing and recording music. My current band is Sombrance. We are a 70's haze rock/shoegazer band. I guess you could say we are influenced by the likes of Pink Floyd, Starflyer 59, and the Violet Burning. I also dabble in an electronic project called Ishur Ninku. This CD, Wallpaper Sky, is my first solo CD and is much more pop friendly than the rest of my music! I have a Bachelor of Arts in English and a Professional Writing Certificate... Yet, I am a Network Administrator by day. Paying the bills is an important factor in life. I love collecting CD's and DVD's. In fact, if I am not at home, I am most likely at the local used CD store. Iced Tea, Hockey, Candles, acquiring new musical instruments, and Autumn days make me happy. Dairy products, heat, unfulfillment, and spiritually misguided people bum me out. If you are still reading this, I thank you! I spend the rest of my time at the Church of God at Baden working in the Homeless Ministry. I think everyone should spend some time doing this... It will change you forever. Well, thanks for reading this stuff. I'll probably change it from time to time just to make you have to read it over again! Peace and Love Rick
