

Enterprise Information Systems Vii

[DOWNLOAD HERE](#)

Preface. Conference committee. Invited speakers. Invited papers. EIS implementation research: an assessment and suggestions for the future; H. Barki. Changing the way the enterprise works - operational transformations; T.J. Greene. Enterprise ontology - understanding the essence of organizational operation; J.L.G. Dietz. Building successful interorganizational systems - IT and change management; M.L. Markus. Part 1 - Databases and information systems integration. The hybrid digital tree - a new indexing technique for large string databases; Q. Xue et al. Musical retrieval in P2P networks under the warping distance; I. Karydis et al. Change detection and maintenance of an XML web warehouse; C.-M. Chao. Choosing groupware tools and elicitation techniques according to stakeholders' features; G.N. Aranda et al. Analytical and experimental evaluation of stream-based join; H. Kostowski and K.T. Claypool. Part 2 - Artificial intelligence and decision support systems. Construction of decision trees using data cube; L. Fu. An application of non-linear programming to train recurrent neural networks in time series prediction problems; M.P. Cuellar et al. Intelligent solution evaluation based on alternative user profiles; G. Bardis et al. Using DMFSQL for financial clustering; R.A. Carrasco et al. Knowledge management in non-governmental organisations: a partnership for the future; J. Braga de Vasconcelos et al. Towards a change-based chance discovery; Z. Wu and A.Y. Tawfik. Part 3 - Information systems analysis and specification. Early detection of cots functional suitability for an e-payment case study; A. Cechich and M. Piattini. Preserving the context of interrupted business process activities; S. Bassil et al. The "right to be let alone" and private information; S.S. Al-Fedaghi. Perspectives on process documentation - a case study; J. Becker et al. Sustainable development and investment in information technologies - a socio-economic analysis; M.J. Pereira et al. Quality of service in flexible workflows through process constraints; S. Sadiq et al. Real time detection of novel attacks by means of data mining techniques; M. Esposito et al. Part 4 - Software agents and internet computing. Generic fault-tolerant layer supporting publish/subscribe messaging in mobile agent systems; M. Tosic and A. Zaslavsky. Boosting item findability: bridging the semantic gap between search phrases and item information; H. Davulcu et al. Integrating agent technologies into enterprise systems using web services; E.H. Ramrez

and R.F. Brena. Part 5 - Human-Computer Interaction. Opendpi: a toolkit for developing document-centered environments; O. Beaudoux and M. Beaudouin-Lafon. Why anthropomorphic user interface feedback can be effective and preferred by users; P. Murano. Distance learning by intelligent tutoring system. Part I: Agent-based architecture for user-centred adaptivity; A. Fernández-Caballero et al. A controlled experiment for measuring the usability of webapps using patterns; F. Javier Garca et al. Author index. EAN/ISBN : 9781402053474 Publisher(s): Springer Netherlands Discussed keywords: Datenbank, Informationssystem Format: ePub/PDF Author(s): Chen, Chin-Sheng - Filipe, Joaquim - Seruca, Isabel
