to be true? Well, it is not if you have the right HTML, PHP or Javascript knowledge. It could take you

many days and weeks and can even cost you a small fortune to figure out just the right combinations to

create them - while others fall flat on their face. But instead of knocking yourself out trying to come up

with those professional looking redirection links, you can now have an awesome redirection creating

soldier, ready at your beck and call. Introducing:- Redirection Rocket The Redirection Rocket software is

so easy to use, even a 3 year old could set it up in less than 10 minutes, and start creating these

awesome links Let me show you how easy it is to use this software once its installed: Step 1: Login The

first step is to login with your completely customizable secret login and password. Step 2: Begin

Campaign Creation After you enter your credentials and your information is authorized, the next step is to

click on the New Campaign link to start the campaign creation process. Step 3: Name Campaign and Set

Destination After that, you are presented with the new campaign form, and there is only two fields to fill

out - Your campaign name and the destination url. Step 4 Verification: The next page you arrive on after

clicking the Create Campaign button, verifies that your new campaign has been successfully entered into

the system. Now you can go and view your new campaign. Step 5: View Campaign After you click the

view campaign link you are able to select which campaign you want to view using a select box. Step 6:

Get Redirection Link After selecting your new campaign you are given access to the new professional

redirection link and the tracking area. This is where you click the redirection link to test and verify it goes

to where you want it to. Step 7: Verify Redirect After you click the redirection url you will be sent to the

destination for your campaign, and now you have verified that the redirect works. Final Step: Verify

Tracker Now that youve verified your redirect, you go back in to the link and tracking area and verify the

click. As you can see our new campaign is now Live and Tracking with our new professional looking link.

Now think about it. If you dont possess the HTML, PHP or Javascript knowledge necessary to manually

hand code your redirection pages yourself, it may take you many days before you can finally experience

the benefits of professional redirection links like these. (Of course, depending on your present level of

skills and knowledge) Why spend the next few days and weeks trying to figure out all of the steps and

codes it takes to create redirection pages by hand -- when you can point-and-click your way to professional redirects in less than 10 seconds each with Redirection Rocket? With Redirection Rocket you can finally look like a professional marketer and track your affiliate link click thru directly from your password protected admin control panel! But Dont Take My Word For It, Look At What My Satisfied Customers Are Saying Works Just As Advertised. Im using redirection rocket and it works just as advertised. I am creating tracking links that are user and search engine friendly in a few seconds each...and loving it.
