

Sarcopenia. Age-related Muscle Wasting And Weakness

[DOWNLOAD HERE](#)

1. Overview.- 2. Molecular mechanisms of muscle wasting in cancer and ageing: cachexia versus sarcopenia.- 3. Age-related remodeling of neuromuscular junctions.- 4. Motor unit remodeling during aging.- 5. Age-related decline in actomyosin structure and function.- 6. Excitation-contraction coupling in aged skeletal muscle.- 7. Mitochondrial function in aging skeletal muscle.- 8. Fibrosis and skeletal muscle aging.- 9. Nuclear apoptosis and sarcopenia.- 10. Age-related changes in the molecular regulation of skeletal muscle mass.- 11. Genetic variation and skeletal muscle traits: implications for sarcopenia.- 12. Proteomic profiling of aged skeletal muscle.- 13. Aging, exercise and muscle protein metabolism.- 14. Reactive oxygen species generation and skeletal muscle wasting implications for sarcopenia.- 15. Exercise as a countermeasure for sarcopenia.- 16. Role of contraction-induced injury in age-related muscle wasting and weakness.- 17. Role of IGF-I signaling in age-related changes in skeletal muscle.- 18. Role of myostatin and TGF-beta signaling in skeletal muscle growth and development: implications for sarcopenia.- 19. -Adrenergic signaling in sarcopenia and other muscle wasting disorders. EAN/ISBN : 9789048197132 Publisher(s): Springer Netherlands, Springer Science & Business Media Discussed keywords: Sarkopenie Format: ePub/PDF Author(s): Lynch, Gordon S.
