

## Mp3 Randall - It's My Turn

[DOWNLOAD HERE](#)

A rugged baritone voice that enjoys singing upbeat songs and can croon a Country Ballad. 9 MP3 Songs

COUNTRY: Country Rock, COUNTRY: Modern Country Details: Hi, my name is Randall, I was born and raised in Tazewell Co. Va. where my love for Country music began as a Child, I moved to Ohio when I was 10 years old. I screamed my lungs out for 2 weeks just to have my friend, who was the lead singer in our high school rock band tell me I couldn't sing rock and he thought I'd make a good Country Singer, at 13 that wasn't what I wanted to hear, after High School I had a lot of turmoil in my life so I started singing Country. I still could remember the words to all those old Country songs I grew up to, Karaoke came along and I tried it, I got hooked and was at it again, I started Hosting Karaoke shows and it didn't take long to realize people were coming to the shows to watch and listen to me, they kept asking me to sing more, this led me to doing performances of my own, people supported the shows and I got started performing. The people really liked to hear Conway Twitty songs and Merle songs and anybody else I could come up with. They Liked My voice and complemented on the Choice of songs I chose to sing, I like Traditional Country as well as today's Country, I love to sing. I still Host Karaoke Shows through the week and I perform with the band on weekends, as well as doing small venues with my sound system by myself. I've been performing 8 years and I do over 200 shows a year. I have my first CD out, It's My Turn. I'm working on my second CD and it should be out by mid Summer. I'm starting a Radio campaign hoping to get some play so the public can decide if they like what they hear. My Goal is to keep the music coming and to do as many performances a Year as I possibly can I'd like to Thank God my Family, Fans and friends for having faith in me and giving me support through the years, Thank You for your Time.

Randall.
