This is the eBook version of the printed book. With this friendly, accessible guide, beginning photographers will learn to take control of their photography and get the photos they want every time they pick up their camera! Beginning photographers often rely heavily on the Auto setting in their photography and abandon perfectly fine cameras in favor of newer, fancier models when they don't get the shots they want. With *Your Camera Loves You*, author Khara Plicanic shows you how to leverage the awesome features of whatever camera you have whether it's a high-performance DSLR or a basic point-and-shoot to get the shots you want every time you pick up your camera. Forget the technical talk of lighting ratios, inverse square laws, or exposure calculations, and follow along with Khara as she uses simple explanations of camera functions to show you how to take the fear out of handling new equipment, tell a story with your photos, and use the camera manual like a map, not an encyclopedic reference. Along the way you'll learn how to correct those yellow dingy photos from your kids sporting events, fix overexposure and underexposure in your landscape shots, and much more.
