Digital Droo is melodic electronic music with a healthy dose of adrenaline, designed to make you temporarily forget what speed limit signs are there for. 13 MP3 Songs ELECTRONIC: Techno, ELECTRONIC: Trance Details: Andrew Tokuda has been banging away at anything that made noise since he was 2 years old. At the age of four, his parents thought it might be a great idea to have him learn to play the piano. Years later, the child non-prodigy has taken on the name, Droo, and the noises that bubbled in that brain of his, has magically found its way through expensive digital toys, into this wonderful thing called "mp3." Since 1999, Droo has been recording music electronically, employing both traditional and synthesized sounds. His music has made its mark on the Macintosh computer community via distribution through MacAddict Magazine. His unique sound has found its way into various game soundtracks and narratives. His first official CD release, Active Lancer Original Soundtrack, is a representation of his "harder" self. There are 11 hard-edged tracks, written specifically for a game in which you, an aerial fighter with some seriously big guns, fly over alien terrain and shoot down bad guys. Included on this CD are sound samples for remixers and DJs. ...A lot of people like that.
