He was a DJ in the midwest during the heyday of the early rave scene and moved to Portland, Oregon in 1996 where he began incorporating melodic vocals with electronic sound. By the year 2000, while most people were jumping on the electroclash bandwagon, he began recording "GLEE," a dance album for drug damaged crybabies which truly puts the "disco" into "discomfort." Portland producer Pfog signed onto the project after getting his hands on an early demo titled "THIS IS FOLK TECHNO" and 2 years later, "GLEE" was born. It is a mix of songs written from 1996-2000 and has received much praise amongst intellectual indie rockers and club kids alike. Logan's self-titled sophomore effort was released in the fall of 2006.
