a fresh dose of thoughtful melodic rockin, head-gyrating art 7 MP3 Songs ROCK: Modern Rock, ROCK: Psychedelic Details: The addiction to NIMBUS is amassing to epidemic proportions, approaching equivalency to the dangerous grips of nicotine, alcohol, and the opiate family. When first your anticipating ears absorb their textured layers of art fused into a rhythmic and harmonic medley of sonic euphoria, it is common to enter a state of complete emotional and physical contentment. To actually experience NIMBUS perform their earthshaking epic compositions is a mind-expanding journey unto itself. Some have even reported a tingling in their feet! The total amount of NIMBUS a person can handle varies according to size and weight, though overdoses have never been reported. This overwhelming substance, or "band" as users like to call them has come too far to be stopped. The facts suggest NIMBUS has been on the black market for a few years now. It is usually taken in rock form, although more mellow-easier to handle-forms are sometimes available. Even without the aide of mainstream "over the counter" distribution, the demand for NIMBUS has managed to spread exponentially. The fact of the matter is that laboratories haven't had the time or capability to fully analyze NIMBUS and render it an officially illegal substance. This technicality has lead to global cyber distribution and attention via CD Baby, Krock-echo.com, LA musicscene.com, and hundreds of other contemporary websites. Though NIMBUS appeals to all those open-minded, NIMBUS seems to be especially popular amongst the experimental college crowd. Reports show evidence of NIMBUS present on the USC, CSU Long Beach, UC Santa Cruz, and San Diego State University campuses. Most popular Los Angeles venues where "the rock" is encouraged, including the Key Club, Whisky, El Rey, Civic Arts Plaza, Viper Room to name a few, have supported NIMBUS events. Here gatherers congregate en masse to intake this alleged drug. The World Famous KROQ heavily promoted one of NIMBUS' tunes, Let It Go in May 03', as did Indie

103.1 in April 04'. Arguably as influential, Joan Rivers has become fond of NIMBUS' effects, using NIMBUS before her popular stand-up routine. Trendsetters like Hits Magazine All Access Magazine have featured NIMBUS and ranked them one of 5 top "bands" to keep watch over. Even Producer of Filter, Rae Dileo has admitted using NIMBUS for some of his latest recording projects at Cello and Conway Studios, and is forever changed. All this notoriety directly stems from NIMBUS' extreme potency, which in turn has won them 1st place in numerous battles and contests. We can see now that NIMBUS is not to be taken lightly. ACTIVE INGREDIENTS: Timothy Deschaine- The most potent of the intoxicating ingredients. Tim will pump you up, drop you down, and raise the hair protruding from your epidermis with his prominent vocals. His guitar work sets a layer of ambiance for the rest of the band to feed from. Adam Howe- Similar to LSD and other hallucinogens, with his lead guitar harmonies and melodies Adam creates in ones ear what can only be described as a "swirling 3 dimensional sound" This is what eventually leaves people stunned or "spun out" and in need of more NIMBUS Robert Petricca- Rob's driving solid drumming will leave you feeling invincible. Tests are still being conducted on the complexity of his rhythmic creativity-effects not fully understood. David Howe- Closely related to the Adam Howe family, David is definitely the euphoric aspect of the band. The low rumbling oscillations, along with his subtle melodic and harmonic interpretation leave one's body throbbing in a pleasurable sensation. NIMBUS is no longer the premonition in some clairvoyant's misunderstood mind. NIMBUS is here, in our homes, on our streets, and in our desire. Though much of NIMBUS is still veiled in mystery, one thing has held true without question: People Like NIMBUS! Please enjoy NIMBUS with a strong will and an open heart.
