

Mp3 Science For Girls - Electronic: Down Tempo

[DOWNLOAD HERE](#)

Electronica with melody and heart. Guest vocals from some of the best in NYC's indie scene. And a Barry Manilow cover. 10 MP3 Songs ELECTRONIC: Down Tempo, POP: with Electronic Production Show all album songs: Science for Girls Songs Details: Science for Girls is melodic electronica from New York songwriter and producer Darren Solomon. "...dont miss the musical juiciness that is Science for Girls, a Moby-style electronica compilation featuring different guest singers on nearly every track. Chilled out and heavy on processed electric pianos, this CD from New York composer Darren Solomon maintains the same balance between synthetic and organic that makes groups like Zero-7 shine." -Keyboard Magazine "Here's some eeenteresting indie electronica for you, from the unsigned act Science For Girls. Sounding pleasingly reminiscent of Junior Boys, the eeenteresting part turns out to be the wholly unexpected hints of Brazilian flavor that sneak in. Neat!" -Comfort Music "Hearing how different talents mesh with Darren Solomon's mellow chords and laid-back production style is a bit like biting into a mystery chocolate. Whether you're met by creamy, lilting vocals, crunchy pitch-shifting plugins, or rich caramel tones, the one thing you can count on is that you'll want more." -Knobtweakers "Science for girls is making me cry sweet sorrowful sugarwater in a secret swimming pool in the basement of a cute, and apparently odd girl. It's so good i almost don't want to listen to it, avoiding the inevitable tarnish." -Comment on Comfort Radio ----- The debut album features nine original songs, plus a unique cover of "Sweet Life", by Barry Manilow. Vocals are handled by some of the best talent from New York's indie scene, including Bronwen Exter, Boots Ottestad, Jean Rohe, Paul Brill, Renee Cologne, Trevor Exter, Alexandra Slous, Bill Mann and Hugh Wilson.
