FACT: The Domain investing industry is not dead. There are millions of common keyword phrases out there, that people are willing to pay for ...which means there are domain names people will gladly pay BIG Bucks to own. What is Domaining? According to Wikipedia, Domaining, or Domain name speculation, is the practice of identifying and registering or acquiring, Internet domain names, with the intent of selling them later for a profit. Why Domaining? The online market changes rapidly, which means there are profitable keyword phrases coming out, virtually on a DAILY basis. The result of this, is a constant flow, of highly profitable, sought after, domain names. While Domaining is indeed very profitable...many new domainers tend to buy tons of domain names, without doing the proper research and following a system! That's where this video series comes in. You see, not only are we going to show you how to find profitable domain names, but we are also going to show you how to increase the value of these domain names ...so when it comes time to sell them, you will make a nice profit on your investment. All you need to do, is follow the simple, legal techniques, set out in this video series. Here's a list of this 7 part video series in more detail: Video #1: Introduction to Domaining In this video, you will be given a brief overview of what
