High End Affiliate Marketing - How to Successfully Sell High-End Affiliate Products The interview of an extremely successful high-end affiliate marketer. His name is Josh Peak. Josh has actually developed a very interesting business model because he is a professional affiliate marketer, but not for your average \$20, \$30, \$100 programs. Josh specializes in high-end affiliate programs. So, when we were talking about high-end we were talking about anything in the range of \$4,000 to \$10,000. So, it's a little bit of a different aspect or way of doing business than it would be for marketing your low-end, up to \$100, affiliate products. So, Josh has agreed to let me pick his brain for a while and basically go through a run through of how he runs his business and how he actually gets people signed up to his affiliate programs when they cost the dollar figures that we were looking at. Imagine uncovering the secrets that powerful high-end affiliates use to sell products that range from \$10,000 to \$25,000. You're about to enter the world of the high rollers where commissions from one sale can be upwards of \$5,000. In this course, Terry Telford interviews Josh Peak, an internet marketer who specializes in high-end affiliate programs. Josh describes how he runs his business and how he actually gets people signed up to his high-end affiliate programs.
