

# Legal Revision And Religious Renewal In Ancient Israel

[DOWNLOAD HERE](#)

This book examines the problem of divine transgenerational punishment and the writers who confronted it. This book examines the doctrine of transgenerational punishment found in the Decalogue - the idea that God punishes sinners vicariously, extending the punishment due them to three or four generations of their progeny. Although a 'God-given' law, the unfairness of punishing innocent people in this way was clearly recognized in ancient Israel. A series of inner-biblical and post-biblical responses to the rule demonstrates that later writers were able to criticize, reject, and replace this doctrine with the notion of individual retribution. Supporting further study, it includes a valuable bibliographical essay on the distinctive approach of inner-biblical exegesis, showing the contributions of European, Israeli, and North American scholars. This Cambridge release represents a major revision and expansion of the French edition, *L'Hermeneutique de l'innovation: Canon et exegese dans l'Israel biblique*, nearly doubling its length with extensive content and offering alternative perspectives on debates about canonicity, textual authority, and authorship. EAN/ISBN : 9780511421228 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Levinson, Bernard M.
