He began "fooling around" with his Grandma's beatup old upright piano at the ripe old age of two and has never looked back! His main love is, and always has been, the old standards, including movie themes (which explains this new CD). At age 13, Johnny moved to the San Fernando Valley area, where he joined the Musician's Union and became a studio musician. As his style developed, he spent more and more time playing the larger Vegas lounges and the Beverly Hills circuit as his love for a "live" audience was always very important to him. "Intoxicating Movie Themes" is Johnny's latest album and is an expression of Johnny's rare talent, and, it is his sincere hope that you find it enjoyable enough to look forward to his next project. For you technical types, Johnny's recording instrument of choice is the Kohler KD-140 Digital 4'7" Grande Ensemble. All sounds are Johnny alone with no multiple recording methods utilized. Johnny now lives in Idaho with his wife Stephanie. Have a great new year and enjoy this great new CD!!
