like u2? oasis? coldplay? west's debut ep is an instant classic. 5 hit songs, bono-esque vocals, and power-pop guitars make this aussie/american outfit one of the hottest tickets in l.a. right now. 5 MP3 Songs POP: Power Pop, POP: British Pop Details: WEST have an EP of five hits, including the much hyped "Come On", amazing live show, and growing list of fans across the U.S., Australia, and the U.K. Formed in 2000 by two Australian cousins and a treasure-diving American, they have written and recorded some of the best Rock/Pop to come out of L.A. in recent years. With influences ranging from U2 to Bowie, WEST features one of the most powerful and gifted frontmen around. Mick Murray sings with an angst and beauty in his voice that not only carries these songs to great heights, but makes these 5 guys truly stand out from the rest. In June of 2004, West found themselves on the TONIGHT SHOW with Jay Leno after KOCH Records asked them to back none other than William Hung. A surreal experience to be sure, but always nice to play for an audience of 8 million viewers.
