

# Sensor And Ad-hoc Networks

[DOWNLOAD HERE](#)

Establishing New Research Initiatives for Theoretical and Algorithmic Aspects of Sensor and Ad Hoc Networks.- Random Graph Models and the Limits of Scalability in Ad Hoc and Sensor Networks.- Analysis of Effective Connectivity in Mobile Wireless Communications.- Some Detectability Issues in Sensor Networks.- Comparative Methods of Channel Assignment in Multivariate Wireless Networks.- Heterogenous Wireless Networks: QoS-Aware Integration Architecture.- Distributed Energy Aware Topology Control Algorithm for Wireless Sensor Networks.- MFACE: A Multicast Backbone-Assisted Face Traversal Algorithm for Arbitrary Planar Ad Hoc and Sensor Network Topologies.- Service-Driven Query Routing in Sensor-Actuator Networks.- Multi-Scale Anchor-Free Distributed Positioning in Sensor Networks.- Evaluation of Time Synchronization Over Mobile Ad Hoc Networks.- Universal Modular Framework for Sensor Networks.- Application and Evaluation of Hierarchical Agglomerative Clustering in Wireless Sensor Networks.- A Fault-Tolerant Scheme for Detecting DDoS Attack Patterns in Cluster-Based Wireless Sensor Networks.- Forming Energy Efficient Bluetooth Scatternets for Sensor Networks. EAN/ISBN : 9780387773209 Publisher(s): Springer, Berlin, Springer US Format: ePub/PDF Author(s): Makki, S. Kami - Li, Xiang-Yang - Pissinou, Niki - Makki, Shamila - Karimi, Masoumeh - Makki, Kia
