

The Exploration Of Supramolecular Systems And Nanostructures By Photochemical Techniques

[DOWNLOAD HERE](#)

From the contents: Excited-state properties.- Photoinduced energy and electron transfer processes.- Spectrophotometry.- Photochemical techniques.- Spectrofluorimetry.- Absorption and emission spectroscopy with polarized light.- Time-resolved luminescence techniques.- Transient absorption spectroscopy.- Spectroelectrochemistry. EAN/ISBN : 9789400720428 Publisher(s): Springer, Berlin, Springer Netherlands Discussed keywords: Photochemie Format: ePub/PDF Author(s): Ceroni, Paola
