Bas Hun-Can't dance no more. Music produced by Aman. Punjabi (East Indian). Bhangra. desidub.com
13 MP3 Songs WORLD: Asian, WORLD: Reggae Details: This is my sixth album. I have produced about 6 albums so far but only in East Indian market. I started as a DJ at the age of 17 but as time went by, I learned more about writing my own music. I started off with remixing and released 4 remix albums on a smaller scale which actually did well. I have been composing, mixing and mastering my work for about 4 years now and each time the tunes get better and better. Seeing the progress, I setup my record label in 2004-DesiDub Records. The last album, "Uforia" was my first original work with various local singers. I am now recording singers that have been trying to get a chance to display their singing talent. I started travelling across the globe to look for singers. "Bas Hun" is my second album with every bit and piece that was put together right in my studio in Reseda expect for the vocals. Vocals were recorded in Punjab, India by Charan Chann. A singer who has been working to come up for the past 11 years. Because of my music and well-mixed tracks, Charan Chann is now looking into bigger deals with Indian music industry. "Bas Hun"'s tracks can be heard here at CDBabyor at my website djaman.com It won't be long before my tunes hit the mainstream! Aman (Musician) Email: djaman79@yahoo.com djaman.com desidub.com
