Related styles: FOLK: Folk-Rock, EASY LISTENING: Adult contemporary People who are interested in James Taylor John Denver Jack Johnson should consider this download. Details: "Daric Paul's 'signature quality' is sincerity. His songs are instantly recognizable by their guilelessness." Stv Skye (Producer) A unique blend of Acoustic Modern Folk, singer/songwriter Daric Paul is a little country, a little rock with a combination of storytelling. His songs draw from personal experiences, reflect on contemporary issues, and convey a message of hope. Returning to his home state of Washington, Daric has embarked on a career in the music industry with the release of his first CD titled Its You I Wanna Be Near. Daric was raised in a family where the children were encouraged to play a musical instrument at some point during childhood. Having a difficult time selecting an instrument he was volunteered for piano lessons. After a few years piano fell to the side and was replaced with athletics. After high school Daric attended college where he would earn a graduate degree in counseling psychology, meet his future wife and begin teaching himself the guitar. Since graduating he has worked in public schools, hospitals, mental health centers and correctional facilities. It was through a shared enjoyment of music and encouragement of a close friend that brought Daric to songwriting. He quickly found songwriting to be invigorating and therapeutic. At the same time he began writing songs he was also preparing for the adventure of fatherhood. Since the birth of his son, Daric has transitioned from practicing counselor to stay-at-home father where he is able to have the best of both worlds as father and songwriter. Daric and his family currently live in Wenatchee, WA. He continues to follow his dream of making music and has started writing songs for a second CD. About the songs The title track Its You I

Wanna Be Near delves into the subject of relationships and fearing the very thing you want. Its easy to become distracted and disillusioned in relationships. Sometimes gaining perspective from a different point of view helps us see beyond temporary disenchantment, allowing us to intentionally focus on change we would like to see happen, increasing the fulfillment from any relationship. At some point everyone goes through difficult times in life. Hold On is about the daily struggle and questioning that can take place, and the clarity found after having such an experience. Sometimes believing in a better day which awaits us is the only way to get us through. Intended as an audience participation song, Sha-La-La originated with friends whose daughters enjoyed listening, singing and dancing with a different song that included sha-la-las. With this song, I look at various stages of my life and into the future. So, whether driving in your car or listening to a live performance, please why dont you sing along. Penned before the birth of our son, both One Day At A Time and Soon Youll See Me Again, were intentionally written for my child to always have as a reminder of the anticipation and excitement of his arrival into this world and a relaxing lullaby with guided imagery. In life, its not uncommon to feel uncertain or lost along the way. Then, there are other times we can all identify with being at Home - a place we feel content, free to be ourselves. Home changes given the time and stage of life were in. The journey often shapes our idea of home, but we always know inside when weve arrived. Anyone who associates a change in time with particular sights, sounds or smells will relate to Seasons Change (a.k.a. Toms Song). I tried to create a picture for the listener to identify with. It doesnt matter how old I am, the change of summer into fall takes me back to memories of football games, small towns and time with the boys. Besides the chorus, Its Apparent was a complete re-write during the recording process. After receiving feedback on the original songs lack of direction and focus I went back to the writing pad. I am happy with the final result and message of hope the song carries. It seemed as though this song gained momentum as each instrumental track was mixed together. Driving Song, truly made for fun, was inspired by a scenic three-hour drive through back country on the way to visit my wife on weekends when she had to work in a different city. It wasnt exactly the love song she anticipated, but when I started writing, this is what came out! Appreciating the tranquil nature of Soon Youll See Me Again, for the last track on the album we elected to have an instrumental rendition of the song titled 1st Lullaby. We decided to add this version at the end as a way to let down the energy before the conclusion of the CD. Enjoy, Daric
