Sophisticated Melodic Rock with a soft, compelling voice and phenomenal tracks reminiscent of a budding James Taylor blended with John Mayer. 12 MP3 Songs POP: Folky Pop, ROCK: Folk Rock Details: This collection of 12 original works composed and recorded during July - October 2002 marks the beginning of this enigmatic artist's re-entry to musical expression since the eighties, whence he has devoted all his efforts in his finance career... but now a "second life" has begun. The result speaks for itself. Wonderful songs and lyrics gush out almost endlessly. Each song touches a deep and personal part of his life. The album as a whole is phenomenally musical, infused by George's passion for the acoustical guitar, his primary instrument for over 30 years. George's musical versatility extends beyond the norm - he played drums, bass, electric guitar, and keyboard throughout the album. His rich melodic vocals resonate through each song with charm and tenderness, hauntingly telling us his deepest feelings in one song, philosophically expressive in another, then playful and joyous in the next. Listen to 'Goodbye Christopher' and feel the love and retrospect of a father facing his only son now grown and leaving for college. 'Cycle Of Life' is as much a reflection of the changing of the seasons and the parallel necessity of our current economic downturn. Making Music just jumped out one beautiful day this past August when in the midst of this project, a natural high, a nirvana state of joy overcame him. 'Union Of Our Soul' winds down the album to a tender reflection of love, and the act of love, and a satisfying conclusion to the first chapter of his second life." If you like what you hear, the rest of this album is even better. Watch out, this creative artist has only just begun his journey.
