

Mp3 Gregory - Soul Catcher

[DOWNLOAD HERE](#)

Native Heart collection of beautifully recorded electronic and acoustic instrumental compositions. Selections are ambient, ethereal and introspective, taking the listener on a soul journey creating an environment of visionary awareness. 11 MP3 Songs NEW AGE: New Age, WORLD: Native American Details: Come take the journey and allow Soul Catcher to capture your Native Heart. Soul Catcher is a Native Heart collection of beautifully recorded electronic and acoustic instrumental compositions, as well as a debut recording by Gregory. The selections are ambient, ethereal and introspective, and take the listener on a soul journey into a "cellular" and historical past creating an environment of visionary awareness and cultural expression. The music is personal and culturally spiritual...a sonic voyage of reflection, vision, and inner exploration. Open your own spiritual portal and allow yourself to be transformed as this CD truly catches and holds your soul during the 51 minute journey. Don't forget to invite your power animals. REVIEWS AND TESTIMONIALS: Soul Catcher, a 2000 release by Gregory is as timeless as the message. This music moves to the front of your consciousness. Gregory expertly blends ancient rhythms with tasteful synthesized sounds, creating both relaxation and rejuvenation. You are led on a special journey as you listen to Gregory's music. Starting with the awakening of your soul with a shaman by your side, you travel through time to the final transformation. Cry Me To Sleep was one particular track that shifted my energy from a sweet sadness to a smooth joy. Gregory moves from one track to the next, much like an elegant dinner moves from course to course. You can almost expect what is coming up next, yet still savor the individual flavors. There are no unpleasant surprises on this CD, but a comfortable selection of soul inspiring music. Nicely mixed and mastered, Soul Catcher is an easy addition to anyone's spiritually inspired collection. - Sky Warnke, Music Reviewer for Equinaut, Colorado Springs, CO (September, 2002) - ----- Thank you so much for

perfectly wonderful Soul Catcher! It is beautiful and delightful music, engrossing music from the first bars. Thank you for the exceptional chance to touch your creation. Thank you for your magic, for peace of your heart, contained in your music. Very best wishes from Siberia. - Serge Tikhonoff, Host of Radio Penguin, Siberia, Russia (December 13, 2001) - ----- On Soul Catcher, his debut recording, Gregory has created an audible landscape in which the listener is invited to spiritually explore. Beneath the electronic melodies emerges a Native American essence, primarily through percussive color. This inspirational CD serves well as a centering point in meditation. While they remain introspective, the compositions herein are anything but dull and lifeless, an oft too common problem in new age or ambient music. - Paula Kirman, Inside World Music (January 9, 2001) - ----- "Come take the journey and allow Soul Catcher to capture your Native Heart." The above statement aptly describes the "cellular" feel to this debut collection of beautifully recorded electronic and acoustic instrumental compositions. Soul Catcher by Gregory offers to the listener a uniquely personal journey of self-discovery. The music can open you to a deeply spiritual cultural past. Soul Catcher is an excellent album for inner world meditation--"don't forget to invite your power animals." - Anne Thiel, Mountain Luminary (Winter 2000-01), Mountain View, AZ, USA - ----- From the opening notes of the title track to Transformation, its infinite conclusion - Soul Catcher captures the imagination, heart and spirit with its thoughtful movements. Composed, performed, produced and engineered by Gregory each piece is a journey unto itself combined with that unique ability only the best composers possess making an overall complete musical statement. An inspiring listen to say the least. - Teresa Conboy Public Relations, Los Angeles, California, USA - ----- I have really enjoyed your music and featured your CD on Planet Waves last Sunday night...I really like your mix of music - it's a well-balanced combination of styles and everything works so well together. Thanks again for sending your CD - I hope you're planning on creating another one! - Susan Dunman, host of Planet Waves, WKMS, Murray, KY, USA - ----- Your music captures the essence that has recently been missing from the recent efforts by many talented musicians. It harkens back to the perfect merging of acoustic and electronic music that the early pioneers experimented with... Congratulations, you should be very proud. It will debut in my top 20 NAV report for the month of May and I suspect will spend a good amount of time there. - Chito Gebhart, host of Morning Breeze, KSBR, Mission Viejo, CA, USA -

----- ...it's very in-depth, as though I'm somewhere else. In fact as soon as I heard it I knew I would be using it on a program... - Dave Butler, host of Innervisions, WRNZ, Lancaster, KY, USA - ----- Absolutely lovely music. "Inti" brought back a lot of memories, thanks! - Gerardo Perez, Colorado, USA -
