Rock/Pop 12 MP3 Songs ROCK: Modern Rock, POP: Power Pop Details: Last Nation are a slick 3-piece from London. The music is sophisticated emo rock with a metallic edge. The emotive style is influenced by Placebo, Muse and Warrior Soul but has it's own unique sound characterised by the diverse backgrounds of the band members. Hailing from Russia, New Zealand and here in the UK the worlds collide to create a unique mix of sound, that of Last Nation. The band are set to tour Japan to promote the album later in the year but prior to this will be playing a number of dates in London and Oxford from July onwards. It's set to be a busy 2005 and with a great response to the album so far there looks set to be no let up in the schedule of Last Nation. So what is "Art of Seduction" all about? Unfortunately it's not a guide to the ways of the women but the music can certainly evoke memories of past liasons or inspire the listener to get out there and meet people. A 21st century view to the modern man or women. But don't believe me, have a listen and find out for yourself. Last Nation, a emotive rock treat with a unique twist... What that twist is you will have to see for yourself!
