Missing Six began building a loyal following in Indianapolis and the small towns of Indiana as they gigged throughout 2003. The band went in to the studio later that same year with well-known producer Paul Mahern (John Mellancamp, The Pieces, Loretta) to record an ambitious full-length album titled "The Philadelphia Experiment." Soon after the release of the album the band went through a unexpected line-up change which has allowed Missing Six to evolve and expand their sound. The change meant welcoming drummer Phil Milam. Phil's jazz background added a new element to the band's already eclectic style. The band has been writing and rehearsing new material over the past year. Missing Six plans to record a follow-up album and resume an extensive gigging schedule in 2005.
