Healing music for relaxation, massage, and/or other healing modalities. all the tracks are smooth nicely orchestrated and smooth transitions from one piece to the other. a very good seller. 12 MP3 Songs NEW AGE: Healing, NEW AGE: Ambient Details: MUSIC USED EFFECTIVELY AS SOUND THERAPY PROVIDES THE EMOTIONAL CONTENT NECESSARY TO RE-BALANCE AND FINE-TUNE THE OVER OVERLOADED SENSORY INPUT AND STIMULI WE ARE BOMARDED WITH DAILY. I have developed a unique system of harmonic overtones in my music that correspond to different parts of the body and brain, helping greatly to reduce stress and imbalance in the body and nervous system. I find that this kind of music has a very soothing effect on the mind and body, giving the listener a chance to reconnect more with their own inner self. To me, this is what makes the music therapeutic?.if it doesn't have a positive, balancing effect on the mind, body, and emotions, it is only fluff, filling the space with sound that is more superficial, and decorative. However music that is specially created and designed by a professional sound therapist and composer, creates a space for the client or listener to connect with their own inner resource more deeply. It's much like a form of yoga, which means union with one's self and the universe. Union creates harmony, peace and a deeper sense of connectedness. After years of sound research, and composing over 25 musical recordings, I was able to create and perfect a very specialized music that is the quickest and most effective form of sound therapy not only to de-stress, but to revitalize, harmonize, and rebalance our energy system mentally, emotionally and physically. I was starting to get letters from hospitals, clinics, chiropractors, yoga teachers, massage therapists, wellness centers, spas, and many people in general stating how much this music was helping them in ways they have never experienced music before. Not only did they love the music, but it also touched their very inner core. VISIT: WWW.AEOLIAH.COM For more articles, info on sound healing.
