I loved those songs and still do love those songs! I love them because they are part of our heritage and history as Christians. These songs are rich in theology and worship! They bridge the gap of the generations, denominations, colors, and boundaries. I want all the students I have worked with over the years to know these songs. I want my friends and family who didn't grow up in the church to know these songs. I want you that may be familiar with hymns to remember them... and let them back into your heart and mind! My prayer is that you listen with an open ear and soft heart. Oh, one more thing... Don't be surprised if your parents or grandparents say.... "that's not the way we used to do that song...." This album is collection of hymns arranged in new, fresh, contemporary way!!!
