Has a fun, positive melody and clean production. (Don't be insulted when I say this it totally suited for video games- the music really makes or breaks a great game) WELL done! Eat your heart out Zelda! A+ Reviewed by: carbonstar from Joplin, Missouri Very happy sound! I like the "bottle rocket" sounds, very perky piece. I couldn't say who you sound like, but I can say you sound good. Good mix, excellent production. Reviewed by: drumwise from Westbrook, Maine nice groove Nice tones, kool groove. I could've used a hook a little sooner, and maybe a little more substance. Kind of Petshop boys-ish. I enjoyed it, but, I'm probably not the best judge. :) Keep up the hard work. Thumbs up. J'aime bien les nuances... a fait un peu musique de l'espace mais j'apprécie! nice drums Melody I like the  
ambience created by this piece. Melodically it is more percussive in structure which suits it fine. Drums  
are well placed. Rhythm Lively, engaging, pleasing to get into. Nice note reverb. Sound like? dont  
know. Moncton, New Brunswick, Canada February 27th, 2004 \*\*\*\*\* Catacombs\*\*\*\*\*  
experimental very unique intro. I like the sound of this synth. this tune defenately is experimental. The  
mood is interesting - I dig those synth's Some of the sounds you're using are a contemporary sound  
experience - but some of 'em are a bit out of date.....but perhaps this was your intention. Like I said this is  
a experimental tune - there is not realy an arrangement. Keep it going ! Basel, New York, Switzerland
